'Payroll without Complications'

'We aim to achieve these things'

'Make your life as easy as possible'

As we are specialists in payroll management and do it 'all day long'. The hard things become easier the more you do them so we use this to take away the stress from your payroll administration. If you ask we will even avoid the form filling and red tape running with the minimal of paperwork to simplify the whole payroll process.

'To Keep the Costs Down'

Because of the volume we do it allows us to use these economies and pass on to you a pricing policy others find hard to match. However we do not hide hidden extras and charge rates are based on billing only for what you use. e.g. if you only want Postal Service response why should you be charged for a courier. If staff are on holiday with no payslip why should you pay for it. We will tailor the costs to suit your budget needs.

'To provide friendly Help when you need it'

Our Payroll staff are there for your service and often a question answered at the right time is all you need so please feel free to ask and we can try to assist from the wealth of experience accumulated in the job or make reference to the extensive regulations library we keep for you and try to explain as jargon free as possible.

'To provide a Professional Approach'

Our software is our own in-house product so can be changed or supplied to suit any special needs for integration, reporting, etc. Our systems conform with the latest legal regulations and are verified for accuracy by using the Independent IMIS Audit scheme which is run in conjunction with the Inland Revenue DSS and Charter Accountants Institute. We are therefore certified by them for the software we use.

Why not give it a try?

After all you only have a headache or 2 to lose.
